Projects

Bilingual Checker

With this project I was aiming to solve problems faced by Linguistics. I created a web app that upload, edit , display , delete data of a csv file in a row by row manner.

Patient Record Management System (web version) (NodeJS, ExpressJS, ReactJS, MongoDB) This is a web application that is used to manage the information of patients and doctors in a clinic. Using this application doctors can give prescriptions to patients.

Patient Record Management System (Android version) (NodeJS, ExpressJS, React-Native,Mongodb)

This application is a upgrade version of the web version of the patient record management system, In this project we have included appointment taking features additionally. On appointment approval doctors can give prescriptions to patients.
